## Some and Farm.

ALSIKE CLOVER.

We believe that but very few of our farmers in Hancock county have had any experience in growing this clover. As our county is well adapted for the different varieties of clover we believe it will pay to give some attention to the introduction of the Aliske. The N. Y. Observer, which is good authority, gives the following as among its good qualities:

"We believe, upon a fair trial, Alsike clover will recommend itself favorably to the farmer and will be preferred to the red, whenever it can be advantageously grown. This year it has been cut six feet four inches in length, and the average length on one acre was four feet. Our stock prefers it to clovers, and the atterswarth does not salivate our horses or cattle. It should be sown with Timothy or stiff grasses, to hold its fine growth up, Pink are well known and highly It will stay green until after harvest, esteemed perennial flowers They distance. when it will be as green as the Timo- can all be easily produced from seeds thy, and not turn black, as our red sown late in Spring. Carnations reclover, when cut late as Timothy is, quire a little shelter or setting in a after being left standing until after cold frame for the winter. The Sweet harvest. It can also be threashed William belongs to the same genus; with timothy, and the seed easily it has been much improved of late separated, and it also acts as a flavor years and is quite a desirable flower. to threshed Timothy and all can be

fed up without waste. "Alsike luxuriates in damp soils, and will not freeze out, as the red fertilizer, as it yields a heavy succulent easier brought through the cold clover, and can also be used well as a matter to plough under. It also has three times the amount of roots that red clover has

attachment combined with the grain drill. Three quarts of Alsike and three quarts of Timothy make a very They way to do it is to have the hens good seeding for an acre."

A correspondent of the Western gives his experience as follows: "It is now six years since I first lay from it without going out into bad cultivated it. At that time it was weather, and if they have been well only grown by a few in Canada, but is fed they will be laying when the new the drouth as well as the Red. It will board—then in bad weather the grow and thrive on low, wet land chickens can be fed by letting down where the Red clover will not do anything, and will last in such grounds as they have eaten, which will cause for years without re-seeding, which the hen to sit still and nurse them

"Stock of all kinds, even hogs, will day, putting fine dry straw, or any leave any other grass, if they can get kind of litter, under the coop when on a field of Alsike, and for hay, the ground is wet, but in moderate there is no better grown than Alsike weather, or whenever dry, let them and Timothy, half and half. For bee. he on the sod. Keep the hen conkeepers, it is invaluable, as it pro- fined till the chickens are a month old, duces as much or more honey than unless unusually mild, and let these the small white clover, and of as good | coops be on a slope facing the south, a quality. It will pay any bee-keeper and away from the haunts of the old owning twenty stands of bees to buy jowls. There are many days in Febtwenty dollars' worth of Alsike clover ruary when the chickens will run seed, and give it to his neigh around the coop picking blades of bors to sow. I consider it one grass, &c, enjoying the sunshine, of the best honey-producing plants which puts them in strong health to we have in Canada. The blos- bear closer confinement in cold spells soms being small and the cup shallow, and during snow storms, which, with the bees can take from them as readily as they can from the White clover. and there will be no drooping wings

"When sown for a hay crop, it should be mixed with Timothy, at the when little chickens raised in glass sown for a seed crop, sow from five to barns; for in any of these places they early in the Spring, with wheat, bar early in the Spring, with wheat, bar gives them an appetite out of doors ley, or oats. I prefer wheat. It which they lose in-doors, however spa. dle of July, in Canada. It should to dig the snow away from the coops turn brown; then cut it when the dew places for them to be placed on, which is on, as it shells much easier than the is quickly done by having a spare

mon red clover thresher. If it has wintered my cows and horses on it for several Winters, without a forkfull of any other hay, and they have done seven, wheat or barley at nine

AFFIDAVIT OF SUPERIORITY OVER ALL OTHERS BLINDFOLD TRIALS Against Steinway's, Chickering's and all Others.

We, the undersigned, make OATH, that at the time of the last Fair of the American Institute, held in New York, immediately following the Preach Exposition in Paris, two Pianos, made by Steinway & Sons, one Piano made by Chiekering & Sons, one Pianos, made by G. C. Manner, and several other makers' instruments were tried against each other, by order and under control of the officers of the Institute, to decide which Piano on exhibition in competition should receive the First Premium "as the best Square Piano known."

To obtain an impartial trial, twice all of said Pianos, were covered with papers, so that one Piano could not be distinguished from another, (during the absence of the Judges) and twice did they select one of said Pianos as the best, which, upon uncovering, both times, proved to be the said PATENT ARION PIANO, awarding it "The First Premium" over all others for being the best Spuare Piano known to them.

This trial was after Chiekering & Sons' Piano had received the Legion of Honor and Medal, and Steinway & Sons the Medal from Napoleon; and the Judges of said trial were EDWARD MOLDENHAULER, Prof. of Music, Musical Director and Originator of the New York and Brooklyn Conservatories of Music.
